**FIRST FEDERAL BANK OF KANSAS CITY
COMMUNITY REINVESTMENT ACT (CRA)
STRATEGIC PLAN
2023 – 2024**

I. INTRODUCTION

First Federal Bank of Kansas City (FFBKC) is a Missouri state-chartered financial institution established in 1934. The Bank is a full-service financial institution headquartered in Lee's Summit, Missouri, offering consumer and retail banking services with emphasis on residential mortgage lending, both locally and on a nationwide basis. FFBKC operates ten (10) full-service branch locations, all located in the Kansas City Missouri-Kansas Metropolitan Statistical Area; four (4) located in Kansas, and six (6) located in Missouri. In addition to the ten branch locations, FFBKC has administrative offices in Leawood, Kansas.

FFBKC offers traditional loan products including residential mortgages, single-family construction, and consumer loans. Agricultural loans are not offered. The Bank's primary focus is single-family residential loans, followed by consumer loans. Mortgage products are offered locally and nationwide, the majority of which are sold on the secondary market. The Bank offers loans for home purchase and refinance, fixed and adjustable conventional mortgage loans; construction-to-permanent, build-job, and speculative construction loans; and purchase and refinance government-guaranteed loans through the Veterans Administration (VA), Federal Home Loan Mortgage Corporation (FHLMC), Federal National Mortgage Association (FNMA) Government National Mortgage Association (GNMA), Federal Housing Administration (FHA), and U.S. Department of Agriculture (USDA).

FFBKC consumer loan products include unsecured personal loans offered nationwide through an online originator and servicer, home-equity lines of credit (HELOC) loans originated in-house nationwide, and vehicle loans including automobiles, motorcycles, trailers, ATVs, RVs, and boats originated in-house in the Kansas City MO-KS MSA.

The Bank provides a variety of deposit services including checking, savings, money market deposit accounts, certificates of deposit, and Individual Retirement Accounts. Additional banking services include internet and mobile banking, electronic bill pay, debit/credit cards, remote deposit capture, bank-owned automated teller machines (ATMs) at the bank's 6 Missouri branch locations, and 13 non-proprietary/branded ATMs in convenience stores (6 in Kansas and 7 in Missouri). The Bank also has partnered with financial technology companies (commonly known as "fintech") to offer a suite of banking products and services to consumers.

FFBKC is regulated at the Federal level by the Federal Deposit Insurance Corporation (FDIC) in the Kansas City region and regulated at the state level by the Missouri Division of Finance (DOF). As a federally insured depository institution, FFBKC is subject to the Community Reinvestment Act (CRA) which requires banks to help meet the credit needs of the assessment area, including low-to-moderate income (LMI) neighborhoods. Due to the Bank's nationwide home loans and deposits business model, the Bank has elected to be evaluated under the Strategic Plan option as provided in 12 C.F.R. § 345.27. This CRA Strategic Plan has been prepared for the 2023-2024 plan year. The CRA Strategic Plan will begin on March 1st, 2023, and end on February 28, 2025, unless a request for an extension is submitted to, and approved by, the FDIC. The Bank is requesting approval of this CRA Strategic Plan by the Federal Deposit Insurance Corporation (FDIC).

A. Financial Information

As of September 30, 2021, in the Reports of Condition and Income (Call Report), FFBKC reported total assets of \$782 million; total loans of \$561 million; total deposits of \$603 million; and total securities of \$103 million. The largest categories of loans by dollar volume include 1-4 1st and 2nd lien residential loans (78%), construction 1-4 residential loans (10%), and consumer loans (12%).

As of September 30, 2022, in the Reports of Condition and Income (Call Report), FFBKC reported total assets of \$912 million; total loans of \$731 million; total deposits of \$617 million; and total securities of \$96 million. The largest categories of loans by dollar volume include 1-4 1st and 2nd lien residential loans (69%), construction 1-4 residential loans (12%), and consumer loans (20%).

As of the most recent Federal exam, performed by the Office of the Comptroller of the Currency (December 2021), the Bank was and continues to be well capitalized.

B. Bank Business Model

Home Loans

FFBKC offers mortgages for home purchase and refinance, and home equity line of credit loans in all 50 states. Loan types include Conventional, VA, FHA, and USDA loans. Most mortgage loans are made outside of the Bank's physical footprint. The Bank utilizes in-house technology, existing relationships, and several lead generation outlets from which to source qualified mortgage applicants. The Bank provides an exceptional service experience from start to finish during the loan process.

Construction 1-4 Residential Loans

FFBKC offers speculative and build construction loans to builders, and construction-to-permanent loans to consumers. Construction loans are made primarily within the Kansas City MSA (Missouri and Kansas).

Consumer Loans

FFBKC offers traditional consumer loans, HELOC, auto, and unsecured personal loans. HELOC loans are made in all 50 states, with 45% to 50% of the HELOC loans originated within the Bank's assessment area. Auto loans to purchase vehicles are originated within the Kansas City MSA but are available in Missouri and Kansas. Auto loans and unsecured personal loans are originated by the Bank through a nationwide Bank-as-a-Service (BaaS) partnership, with the majority of the refinance auto and unsecured personal loans made outside of the Bank's assessment area.

Deposits

FFBKC offers a full range of deposit products to consumers, primarily within the Kansas City MSA but available in Missouri and Kansas. Product types include non-interest bearing and interest-bearing checking accounts to consumers and to smaller businesses (generally, sole proprietorships and LLCs) and not-for-profit organizations. Other account types include savings accounts, certificates of deposit, money market accounts and IRAs, again primarily within the Bank's market area. Deposit acquisition is currently through two channels: through its 10 retail branches in the Kansas City MSA, and through its digital banking channel in a broader area.

C. Bank Strategic Direction

FFBKC concentrates on providing financial services including home loans, construction loans, consumer loans, and deposit products that improve consumers' and our customers' financial wellbeing. The Bank is focused on providing products and services to its customers and the community "when, where and how the consumer/customer chooses" and with an exceptional experience. Product acquisition and delivery is through the traditional retail banking center channel, digital channels, including online and mobile, and by partnering with fintech companies to expand products, services, customer demographics, and market area.

The Bank's Vision Statement is "prosperity and a home for all." The Bank plans to continue increasing the origination of mortgage and consumer loans, both locally and nationwide, through new and existing relationships and by using emerging technology platforms. Also, strategically partnering with fintech companies to expand the Bank's loan products and geographic footprint and reach individuals and communities nationwide and locally that may be underserved.

FFBKC is committed to providing a full range of low-cost banking deposit products and services for all consumer income levels, including low-to-moderate income communities. Local communities are served by the Bank's retail branches and by using innovation and technology to provide better customer service and account access, lower cost products, and exceptional customer experience. The Bank offers secure, effective, and efficient payment processing options including check processing, ACH, debit/ATM/POS cards, wire transfer, remote deposit capture, and personal and small business online/mobile banking.

As an engaged corporate citizen with deep and longstanding historical ties to the community, the Bank is committed to helping the people and communities served "build a better financial future." (this is the Bank's Mission Statement). The Bank's culture strongly encourages and promotes employee volunteerism and service with community support and development organizations, charities, and other groups. These activities are designed to provide leadership and support, to identify unmet credit and banking needs in the community, and to help develop products that are safe and sound for the Bank. Additionally, the Bank provides monetary support, when possible, by setting aside a portion of pre-tax profits for donation and sponsorship.

The organizations and community partners supported by the Bank fall generally, but not exclusively, into these categories:

- Community and economic development
- Education and youth activities
- Arts and culture
- Health and human services

The Bank provides online and in-person resources that focus on these key areas:

- Homebuyer education workshops
- Financial literacy workshops – including credit, budgeting, debt reduction, savings
- Promotion of low-cost checking and saving products
- Mortgage education

The Bank has and will work to ensure these opportunities are available in English and Spanish.

D. Historical CRA Performance

The Bank's Community Reinvestment Act program is governed by a CRA Committee whose primary objective is to ensure the effective implementation of the Bank's CRA Plan by holding quarterly meetings to review lending activity, marketing strategies, investments, and community activities for compliance with the Plan and reporting on these activities to the Board of Directors.

The CRA Committee is comprised of the following officers: President and Chief Executive Officer, Senior Vice President/Community Banking, Chief Risk Officer, Chief Credit Officer, Compliance Officer, Community Development Officer, and Director of Mortgage Operations.

The Bank was most recently examined in March 2019 by its regulator (OCC) for CRA compliance under the Intermediate-Small Bank evaluation. This evaluation included a review of the Bank's development lending, services, and investment activities. The Bank received an overall **Satisfactory** rating.

II. FFBKC STRATEGIC PLAN DEVELOPMENT

The Community Reinvestment Act encourages banks to help meet the credit and banking needs of the communities in their assessment areas, which include the communities in which they operate deposit-taking, full-service branches. The CRA regulation allows banks to elect to be assessed under a CRA Strategic Plan. Assessment under a CRA Strategic Plan allows a bank to design a program that is appropriate to its own capabilities, business strategies, and organizational framework, as well as to the communities it serves.

Through this Plan, the Bank is affirming its long-standing commitment to help meet the credit needs of its communities, including low-to-moderate income persons and areas in its assessment area. Consistent with this obligation and with safe and sound banking practices, the Bank is committed to a robust CRA program which includes consumer loans and home mortgages, community development loans and investments, and community development services activity, to assure its part in enhancing the communities in the Bank's self-defined assessment area. The Bank strives to maintain contact with community leaders, non-profit organizations, and other interested parties to determine critical needs in the community and assure its CRA program and this Strategic Plan is delivered effectively.

A. CRA Strategic Plan Regulatory Overview

Community Reinvestment Act regulations provide that a financial institution can elect to have its CRA performance evaluated under the Strategic option. The Strategic Plan enables the institution to tailor its CRA goals and objectives to address the needs of its community consistent with its business strategy, operational focus, and capacity and constraints.

The CRA requires a bank formulating a Strategic Plan to establish measurable goals for helping meet the credit needs of its assessment area covered by the Plan, particularly the needs of low-to-moderate income geographies and individuals, through lending, investments, and services. This Plan is made available to the public for comments prior to the Strategic Plan being approved to ensure the needs of the community are met.

B. Competition

The Bank conducts business in a highly competitive environment among other banks, credit unions, and non-deposit financial institutions both locally and nationally. Per the FDIC's June 2022, Deposit Market Share Report (most recent available), 120 financial institutions exist in the Kansas City Metropolitan Statistical Area (MSA) operating in 670 offices. As of the June 2022 report, FFBKC ranked 24th with 0.70% share of the deposit market (see Appendix A).

C. Assessment Area

Regulatory Definition

The CRA requires financial institutions to define the area(s) upon which its CRA performance will be evaluated. The assessment area(s) for a bank must:

- Consist of one or more MSAs, or one or more contiguous political subdivisions, such as counties, cities, or towns, and

- Include geographies in which the financial institution has its primary office, its branches, its deposit taking ATMs, and the surrounding geographies in which the financial institution has originated or purchased a substantial portion of its loans on which the financial institution elects to have its performance assessed.

Requirements of the CRA place the following limitations on the Bank's defined Assessment Area:

- Must consist of whole geographies
- May not reflect discrimination
- May not arbitrarily exclude low-to-moderate income geographies, and
- May not extend substantially beyond an MSA boundary or beyond a state boundary unless the assessment area is in a multistate MSA.

FFBKC Assessment Area Description

FFBKC has designated one assessment area (Kansas City Assessment Area) comprised of six contiguous counties located entirely within the multistate Kansas City MSA. Those counties include Jackson County, Clay County, Platte County, and Cass County in Missouri, and Johnson and Wyandotte counties in Kansas. The Bank's CRA assessment area is based on several factors, including the Bank's size, branch locations, lending expertise, and competition. The delineation of the assessment area complies with the regulation and will not arbitrarily exclude any low-to-moderate income areas.

Economic and Demographics of Assessment Area

The Bank's assessment area for 2022 includes all 551 census tracts in the six counties listed above, which are comprised of the income designations listed below: 56 low-income, 137 moderate-income, 187 middle-income, and 147 upper-income tracts. Tracts not reported were 24.

As a result of the global and national COVID health crisis, the federal government provided businesses with PPP loans and individuals with federal subsidy payments. Also, the invasion of Ukraine by Russia in February 2022 caused additional supply chain issues and inflation began to increase. Thus, to stem inflation the Federal Reserve began to raise interest rates in March 2022. Prior to March 2022 the Fed Funds Rate was 0.25% to 0.50 %, but since March 2022, the Federal Reserve has raised the rate 5 times, and as of September 21, 2022, the Fed Funds Rate was 3.0% to 3.25%. The significant and rapid increase in the Federal Reserve Fed Funds rate has significantly impacted the housing industry, as well as inflation. Specifically:

- Mortgage Rates Prior to March 2022 – Mortgage rates were historically low in 2020 and 2021 with 1-4 family origination consisting of 58% refinance and purchase 42%. Many investors purchased lower-priced homes to “flip” or rent, thus reducing the housing inventory available for purchase for low-to-moderate income borrowers. This housing market also caused “bidding wars” including in the Kansas City market, which also pushed low-to-moderate income borrowers out of the purchase market.
- Mortgage Rates Post March 2022 – Mortgage rates, for a 30-year fixed rate loan, were 2.9% to 3.1% in 2021, and by October 2022 FHA mortgage rates were at 6.625%. Again, housing became less affordable for low-to-moderate income borrowers due to the increase in rates and mortgage payments.
- Inflation – The U.S. Core Inflation Rate was less than 2% prior to 2021; however, in 2021, inflation began to increase and by February 2022 inflation reached a 40-year high of 6.4% and

continued to increase. As of September 2022, inflation reached a high of 6.5%. Higher inflation increases the cost of food, energy, shelter, vehicles, and other consumables, and reduces consumers' discretionary spending. Inflation severely affects low-to-moderate income consumers as more of their income is directed to "living" or "essential" expenses and are thus unable to afford the cost of rising home prices or to make improvements to their home.

The Federal Reserve Bank of Kansas City noted the following summary of economic activity in the 10th District (Beige Book September 2022):

- Households are beginning to report difficulty in meeting regular expenses, and delinquencies on utility payments are picking up slightly. Consumer delinquencies on credit cards and mortgages remained subdued.
- Prices in the district rose broadly at a robust pace. More households express difficulty in meeting regular expenses.
- There is an increased prevalence of property investors in both rural and metro rental markets contributing to increasing rental rates.
- Housing affordability challenges for renters and owners grew moderately, particularly for low-to-moderate income (LMI) households. Although purchase prices of single-family homes moderated, rising interest rates have pushed many prospective LMI buyers out of the market. Eviction cases increased in recent months.
- Loan demand weakened modestly in the past month as rising rates and heightened economic uncertainty adversely affected borrower demand. Bankers raised concerns regarding rising inflation and the prospect of a recession.

Table 1: Demographic Information of the Assessment Area

Demographic Characteristics	Total	Low	Moderate	Middle	Upper	Not Reported
Geographies	551	10.2%	24.9%	33.9%	26.7%	4.4%

Source FFIEC				

Competition

Within the Kansas City Metropolitan Statistical Area (MSA), FFBKC operates in a highly competitive environment for home loans, residential construction loans, consumer loans, and deposits. The Bank competes with large financial institutions including Bank of America, U.S. Bank, BMO Harris Bank, Wells Fargo, JP Morgan Chase, PNC Bank, and others.

Based on 2021 HMDA aggregate Data, FFBKC was ranked 36th out of 683 mortgage lenders resulting in 0.85% of the mortgage market share within the Bank's assessment area. FFBKC was ranked 24th out of 120 banks in the Kansas City MSA FDIC Deposit Market Share Report, as of June 30, 2022.

III. FFBKC CRA STRATEGIC PLAN

The Bank's CRA Strategic Plan goals were established to contribute to and meet the needs of the individuals, families, and communities within its assessment area. The Plan was created by taking into consideration the Bank's three core strengths and areas of focus: home loans, consumer loans, and deposits. These three core strengths are incorporated to meet the needs identified above, including:

- Increased access to low-cost products and services, including those residing in low-to-moderate income areas
- Lending to low-to-moderate income borrowers
- Supporting CDFIs with investments through time deposits or community development lending, either directly or through participations with CDFIs
- Partnering with organizations by providing community services (for example, financial education, donations, and volunteerism).

The Strategic Plan's measurable goal areas were established using the Bank's historical CRA data, historical home mortgage lending numbers, and business strategies, including growth. The goals were established by reviewing regulatory guidance as well as reviewing the approved CRA strategic plans of other financial institutions. The current economic and housing environment discussed elsewhere in this Plan was heavily considered in the establishment of the Bank's goals.

A. Length and Term

FFBKC's CRA Strategic Plan will encompass two (2) years beginning on March 1st, 2023, lasting through February 28th, 2025. The Bank submitted this Plan approval to the FDIC on March 13, 2023, to be effective as of March 01, 2023.

B. Performance Criteria

The Bank's measurable goals were established at levels that should be achievable in the short term and sustainable in the long term, depending on the relevant economic conditions at that time, and based upon safe and sound banking practices. The Bank believes the measurable goals compare favorably with other similarly situated financial institution goals that were reviewed during the development of this Plan. The goals were segmented into two main categories: Lending, and Community Development.

Currently, FFBKC primarily provides consumer lending (mortgage and consumer) and deposit products. In 2023, management plans to establish a small business loan program, thus expanding into a new product and market segment for the Bank. Small business loans will be originated in the Missouri-Kansas Metropolitan Statistical Area. Management plans to roll the loan program out slowly in 2023 and 2024, thus it is not considered in this Plan.

Election of Alternative Performance Evaluation

In the past, the Bank was examined under the performance tests and standards of an Intermediate-Small Bank. This is the Bank's first Strategic Plan. Should the Bank miss the measurable goals outlined in the Strategic Plan, the bank would elect to be evaluated under the examination standards in Part 345 that are applicable to the bank at that time.

Lending

The Bank has a strong history of providing exceptional customer service, expertise, a wide range of loan products, and competitive pricing for residential mortgage loans and consumer loans. Therefore, the goals outlined reflect the Bank's continued commitment to these two core areas and will leverage the Bank's expertise and competitive advantage. However, there are significant economic and housing factors (as noted earlier in Section II "Economic and Demographics of Assessment Area"), including management's projection of a recession in 2024, that requires consideration when evaluating the residential mortgage and consumer lending goals.

Mortgage Lending

Each year, the Bank's management team prepares a budget, approved by its Board of Directors, which attempts to forecast mortgage volume based on expected interest rates for the next year. Given this assumption and recognizing our desire to improve FFBKC's mortgage lending volume in LMI census tracts, we have established the goals shown below. For purposes of the Mortgage Lending goals for 2023 and 2024, FFBKC's management projects mortgage volume in 2023 and 2024 to be lower than 2020 and 2021 lending volumes based on Fannie Mae's and Mortgage Bankers Association's (MBA) housing projections for 2022 and 2023 (see below). Both reflect lower loan volumes in 2022 and 2023 for purchase and refinance 1-4 single-family residential loans, and higher mortgage interest rates. Below are housing projections:

Table 3: Fannie Mae & Mortgage Bankers Association (MBA) Housing Projections

	Fannie Mae				MBA			
Description	2021	2022	2023		2021	2022	2023	2024
SF Mtg Originations (#)	4,570	2,330	1,735		4,436	2,257	2,047	2,311
Purchase (#)	1,900	1,629	1,343		1,863	1,586	1,534	1,676
Refinance (#)	2,670	701	392		2,574	671	513	635
Refinance Share (%)	58%	30%	23%		58%	30%	25%	27%
30-Yr Fix Interest Rate	3.0%	5.3%	6.4%		3.1%	6.7%	5.4%	4.5%

The Bank's loan origination volume is reflecting a similar mortgage origination forecast as that of Fannie Mae and MBA housing projections; however, the Bank is experiencing significantly lower percentage of mortgage origination in 2022 YTD. Below reflects the Bank's total mortgage loan origination volume (in and out of the Bank's assessment area) by year, and year-over-year change. It's difficult in the current economic and housing conditions to project 2024 mortgage loan originations; however, if conditions do not significantly improve the 2024 budget, for total mortgage loan originations, will most likely be similar to the 2023 budget.

Year	#	YoY Chg	\$ (000)	YoY Chg
2020	2,606		831,392	
2021	1795	(31.12%)	582,044	(30.00%)
2022	609	(66.07%)	225,655	(61.23%)
2023*			100,000	(59.54%)
Source: HMDA LAR				
* Management 2023 Budget Projection				

Therefore, FFBKC's goals below reflect the mortgage lending volume that we believe, if achieved, would be evaluated as satisfactory and outstanding.

Consumer Lending

The Bank's consumer loan portfolio consists of revolving open-end (HELOC), automobiles, and other consumer loans (unsecured loans). In May 2019, the bank entered a relationship with a BaaS partner who originates and services unsecured consumer loans and in 2022 engaged the BaaS partner to originate refinance auto loans. The consumer loan portfolio growth is the result of the increased volume generated by the unsecured and refinance auto loans originated, nationwide, by the BaaS. Below is a summary of the Bank's consumer loan portfolio.

Description	09/30/21	09/30/22
% Consumer Loan Portfolio to Total Loans	16.59%	24.39%
Revolving (HELOC) - % to Total Consumer Loan Portfolio	24.78%	17.69%
Automobile - % to Total Consumer Loan Portfolio	4.19%	3.75%
Other (Unsecured) - % to Total Consumer Loan Portfolio	70.61%	78.38%

The revolving (HELOC) portfolio decreased due to high refinance volume in 2021, resulting from historical low loan interest rates.

Unsecured consumer loans increased significantly as result of our partnership with the BaaS partner offering unsecured consumer loans nationwide. In mid-2022 the Bank reached its concentration limit of \$140 million; thus, the number of unsecured loan origination volume in 2023 and 2024 will be lower as the Bank will only be replenishing the unsecured loan portfolio that has repaid in the prior month (as of July 2022, and projected in 2023 unsecured monthly origination will be approximately \$3.5 million).

Additionally, the Bank has reached its concentration risk appetite for unsecured consumer loans. Thus, management is projecting 2023 total consumer loan originations to be \$18.5 million compared to \$108 million in 2021, and \$109 million through 11/30/22.

With a nationwide presence in consumer lending the following is a geographic distribution of the consumer loan originations, nationwide, for 2020 and 2021, and 2022 year-to-date, by Median Family Income Census Tracts.

TOTAL ORIGINATED CONSUMER LOANS BY MEDIAN FAMILY INCOME CENSUS TRACT

Year	# Units	Low Income		Moderate Income		Middle Income		Upper Income		Not Reported		Unknown	
		#	% Total	#	% Total	#	% Total	#	% Total	#	% Total	#	% Total
2020	993	34	3.42%	201	20.24%	407	40.99%	312	31.42%	6	0.60%	33	3.32%
2021	6,551	231	3.53%	1,352	20.64%	2,708	41.34%	2,059	31.43%	49	0.75%	152	2.32%
2022*	4,694	147	3.13%	834	17.77%	1,987	42.33%	1,572	33.49%	32	0.68%	122	2.60%

* YTD Data as of 11/30/2022

The following is a geographic distribution of the consumer loan origination within the Bank's Assessment Area, for 2020 and 2021, and 2022 year-to-date, by Median Family Income Census Tracts.

ORIGINATED CONSUMER LOANS IN BANK'S AA BY MEDIAN FAMILY INCOME CENSUS TRACT

Year	# Units	Low Income		Moderate Income		Middle Income		Upper Income		Not Reported		Unknown	
		#	% Total	#	% Total	#	% Total	#	% Total	#	% Total	#	% Total
2020	259	11	4.25%	60	23.17%	108	41.70%	79	30.50%	1	0.39%	0	0%
2021	286	10	3.50%	81	28.32%	107	37.41%	87	30.42%	1	0.35%	0	0%
2022*	278	8	2.88%	57	20.50%	111	39.93%	100	35.97%	2	0.72%	0	0%

* YTD Data as of 11/30/2022

The geographic distribution of the consumer loan originations within the Bank's Assessment Area, for 2020 and 2021, and 2022 year-to-date is comparable to the geographic distribution for total consumer loan originations (nationwide).

Community Investments & Services

To support community development, particularly in low-to-moderate income areas and within the assessment area, the Bank has elected to focus its goals on community investments and services. Organizations the Bank elects to provide financial support for will have specific goals and/or be mission-aligned with the Bank for meeting the needs of the low-and moderate-income individuals located within the assessment area, as well as those in-line with overall Bank objectives and values.

- (a) Development & Investment - The Bank plans to seek out investment opportunities, including but not limited to: increasing the amount of Community Development investment and/or lending activities with CDFIs located in the Bank's assessment area, along with women- and minority-owned financial institutions, purchasing eligible mortgage-backed securities where the underlying loans are made to support low-and moderate-income individuals located within the assessment area.

Historically, the Bank has provided construction loans to Community Housing of Wyandotte County (CHWC) for the construction of single-family homes in Wyandotte County, Kansas, has participated in Missouri Housing Development Commission (MHDC) bond programs, has invested in time deposits in CDFIs, and purchased mortgage-backed securities in low- and moderate-income areas within the assessment area. The Bank offers a home loan grant program to qualified low-and moderate-income individuals and legal alien residents.

The Bank has supported local schools in the assessment area through contributions for use in providing financial education to students. In addition, the Bank has provided contributions to various local community organizations that serve low-and moderate-income individuals. Some of these organizations include Habitat for Humanity of Kansas City, CHWC, CHES Inc., and Catholic Charities of Kansas City/St. Joseph and Catholic Charities of Northeast Kansas. Other organizations who support the needs of the less fortunate include Restart and Hillcrest Transitional Housing for the Homeless.

- (b) Community Development Services - All directors, officers, banking center managers, and employees are encouraged to actively participate in local civic and/or community groups, neighborhood revitalization projects, schools, not-for-profit boards (e.g., Chambers of

Commerce, Community Development Committees, School Boards, special community projects). Also, the Bank has key officers positioned in real estate focused organizations to inform the respective members of local needs and community developments (e.g., Home Builder's Association and Mortgage Bankers Association).

In addition to the specified measurable goals outlined in the Strategic Plan, the Bank requests additional consideration for the deposit products provided through the local retail branches, the nationwide online channel, and the Bank's strategic fintech partnership, all of which directly benefit LMI communities inside and outside the Bank's assessment area. Often, access to low-cost banking services is the first step for individuals in LMI areas. The Bank believes the products and services offered by fintech companies allow greater access for consumers inside and outside the Bank's assessment area. This includes the Bank offering deposit and consumer loans. The Bank's digital banking platform primarily provides easy and affordable access to deposit products as well as encouraging and assisting consumers in establishing savings funds, budgeting, and financial education assistance. These principles are important to the Bank and continue our commitment to providing access to financial products to low- and moderate-income consumers.

- (c) Non-Profit Banking – The Bank will seek to deepen its relationships and expand into new relationships with KC-area non-profit organizations. The Bank has an active business deposit banking relationship with several non-profits and provides banking services to their clients and employees. Over time, these relationships are expected to result in loan requests (primarily for owner-occupied real estate) and will help the Bank support the community through lending activity. The Bank believes increasing its effort in this area leverages existing relationships and will have positive effects on deposit growth, opportunity to reach the un- and unbanked, and community outreach.

C. Oversight

The Bank's CRA Committee, as established by the Board of Directors, is responsible for the oversight of CRA activities. The CRA Committee monitors Plan performance and reports to the Board of Directors on at least a quarterly basis. Any changes to the Plan, deemed necessary, will be made in accordance with the FDIC's requirements, guidance, and approval process. Such changes will only be considered if there are significant changes to economic conditions and/or Bank capacity. The Bank's Board of Directors and senior management will ensure adequate resources are dedicated to implementing the Plan, and will oversee, with the CRA Committee, progress in meeting Plan goals.

D. Strategies to Deliver Goals

To further enhance the Bank's CRA record, to continue delivering affordable financial products and service to the low-to-moderate income community, and to assist in developing goals herein, the Bank believes the following strategies delivered should include, but are not limited to:

- Create/enhance roles within the Bank's organizational structure to monitor and analyze CRA performance metrics and report CRA related activity to senior management and the Board.
- Strengthen engagements and partnerships with community-based organizations and area leaders serving low-to-moderate income persons and communities in the assessment area.

- Enhance training for relationship managers, bankers, and lenders relating to CRA concepts, programs, and products to help identify and deliver CRA loans and related activity to the assessment area.
- Focus on partnering with consumers located in low-to-moderate income communities in the assessment area.

IV. FFBKC CRA STRATEGIC PLAN MEASUREMENT

Although the plan starts effective March 01, 2023, and includes goals for 2023 and 2024, the yearly goals are based on 12 months of activity. Specifically, the goals will include activity from March 01, 2023, to February 29, 2024, and the 2024 goals will include activity from March 01, 2024, to February 28, 2025.

A. Mortgage & Consumer Lending Tests

Goals 1 & 2: Mortgage Lending to LMI Borrowers and in LMI Census Tracts

As noted in Section II “Economic and Demographics of Assessment Area” and Section III “Mortgage Lending” the projected economic and housing forecast for 2023 and 2024, including projected recession in 2023 possibly into 2024, and the Bank’s 2022 year-to-date mortgage origination declining 66% from 2021 mortgage originations, are factors taken into consideration for 2023 and 2024 mortgage lending goals in LMI Tracts.

Goal 1 measures the dollar volume of home mortgage loans secured by closed-end first and second (junior) liens of 1-4 family residential properties to LMI borrowers in the Bank’s assessment area (AA). Goal 2 measures the dollar volume of home mortgage loans secured by closed-end first and second (junior) liens of 1-4 family residential properties in LMI areas in the Bank’s AA. Open-end home equity lines of credit (HELOCs) will be excluded from the home mortgage lending goals but included in the consumer lending goals. This is because the bank started collecting HELOC data on the 2023 HMDA Loan Application Register (LAR); therefore, the bank has no historical information regarding borrower income to form accurate goals. These goals include loans reported on the bank’s HMDA LAR with the exception of HELOCs.

Due to the housing forecast in 2023 and 2024 loan originations will be significantly lower than 2020 and 2021.

Lending Test

Goal 1: Mortgage Lending to LMI Borrowers (Dollar Volume of Total Mortgage Loans in AA)

	2023 \$	2024 \$
Satisfactory Goal	\$11.4M	\$11.4M
Outstanding Goal	\$13.4M	\$13.4M

Lending Test

Goal 2: Mortgage Lending in LMI Census Tracts (Dollar Volume of Total Mortgage Loans in AA)

	2023 \$	2024 \$
Satisfactory Goal	\$8.4M	\$8.4M
Outstanding Goal	\$10.4M	\$10.4M

FFBKC Historical Lending Performance to LMI Borrowers in the AA:

- 2020 - \$29,630,000
- 2021 - \$33,630,000
- 2022 - \$22,170,000

FFBKC Historical Lending Performance in LMI Areas in the AA:

- 2020 - \$16,345,000
- 2021 - \$24,200,000
- 2022 - \$17,200,000

Goal 3: Consumer Lending in Census Tracts based on Census Tract Income Category

As noted in Section II “Economic and Demographics of Assessment Area” and Section III “Consumer Lending”, other factors constricting consumer lending is less discretionary income consumers have for home improvement, auto, and other consumer loans.

This goal measures the number of originated consumer loans (includes revolving open-end credit (HELOC for any purpose), automobile, unsecured, credit builder, and other consumer loans for household and other personal expenditures) in LMI census tracts within the Bank’s assessment area. Due to the economic forecast in 2023 and 2024, and because the Bank has reached its concentration risk appetite for unsecured loans, consumer loan originations will be significantly less than in 2020, 2021, and 2022.

Lending Test
Goal 3: Consumer Lending to LMI Census Tracts in Assessment Area

	2023	2024
Satisfactory Goal	#50	#50
Outstanding Goal	#60	#60

FFBKC Historical Performance

- 2020 Low/Moderate Income: 71 Originated Loans in AA LMI Tracts
- 2021 Low/Moderate Income: 91 Originated Loans in AA LMI Tracts
- 2022 Low/Moderate Income: 65 Originated Loans in AA LMI Tracts*

* - Data as of 11/30/22 annualized

B. Community Development Test**Goal 4: Aggregate Community Development Loans and Investments**

Development Lending: As a Mutual State Savings Bank, the Bank’s primary means to maintain and/or raise capital is through retained earnings. Whereas other bank charters allow banks to raise capital through issuance of stock and retained earnings. With limited means to raise capital, management prudently maintains a higher capital level for safety and soundness.

As a Mutual State Savings Bank, the Bank is a consumer lender, primarily originating single family mortgage loans and consumer loans. The Bank does not have expertise in commercial lending and thus does not have small business loans, multi-family, commercial and industrial, or lease financing

portfolios. Due to lacking the expertise in originating commercial / business loans the Bank has a greater emphasis on community development investments and service.

The Bank has developed a relationship with CHWC (Community Housing of Wyandotte County) for providing home construction loans. In 2020, the Bank originated four loans to CHWC; however, due to COVID pandemic disruption the construction of these homes was delayed. Thus, CHWC did not originate any loans in 2021.

Regarding community development lending, loans other than multi-family dwelling that meet the definition of affordable housing may not be considered under both the lending-related goals (Goals 1-3) and community development related goal (Goal 4). Credit for lending will be based on the definitions of Community Development under the CRA.

Development Investments: In 2020 and 2021, the Bank invested in mortgage-backed securities collateralized by properties in and/or originated in low to moderate income census tracts and/or low to moderate individuals in the Bank's assessment area. The Bank has also invested in time deposits in community development financial institutions in the Bank's assessment area. The Bank has a "Better Together" Home Loan Grant program providing grants to low to moderate income borrowers or borrowers who are purchasing a home in a low to moderate income census tract within the Bank's assessment area. With reduced mortgage and consumer lending volume and higher operating costs (rising wages and benefit costs), the Bank's earnings will be significantly less than in 2020, 2021, and 2022 during the high mortgage volume period.

The community development investments, in the Bank's assessment area benefiting LMI individuals and geographies, will be calculated using the total dollar volume of investments (new, renewals, or outstanding balances based on book value from prior period) made in the Bank's assessment area during the plan year. Regarding prior period investments for each Plan Year, the total amount of qualified investment may include the outstanding book value of prior period investment as of the last day of the applicable Plan year (February 29, 2024 for Plan year 2023, and February 28, 2025 for Plan year 2024). Also, an investment made in 2023 will count for 2024 provided the investment remains outstanding.

Credit for investments will be based on the definitions of Community Development under the CRA.

This "Aggregate Community Lending and Investment" Goal measures the percentage of community development loans and investments in the bank's assessment area benefiting LMI individuals and geographies per Plan year as percentage of the bank's Tier 1 Capital. The Aggregate Community Lending and Investment" goal includes community development lending, and community development investments, including donations directly to organizations committed to supporting LMI individuals and communities; and home grants directly to borrower(s) who is a LMI individual(s) or purchasing a home in a LMI community.

Tier 1 Capital is based on "Common Equity Tier 1 Capital Before Adjustments and Deductions" as of December 31st, of the goal year. For example, the Tier 1 Capital figure as of December 31, 2023, is used to assess the 2023 "Aggregate Community Lending and Investment".

Aggregate Community Lending and Investment
(As Percentage of Tier 1 Capital as of December 31st of Prior Year)

	2023	2024
Satisfactory Goal	4.50%	4.50%
Outstanding Goal	5.15%	5.15%

% of Tier 1 Capital (December 31 st)	3.25%	2.99%	3.99%

Goal 5: Community Development Services

This Community Development services goal measures the Bank's ability to serve customers through qualified service activity. This goal will be calculated using the total number of qualified services completed by Bank personnel during the Plan year. Credit for services will be based on the definitions of Community Development Services under the CRA.

C. Public Participation

Community Organization Symposium

On Wednesday, October 26, 2022, FFBKC hosted a **Community Impact and Needs Symposium** luncheon at the Bank's Leawood, Kansas Administrative Center with top leaders from Kansas City representing (36) non-profits, (5) faith-based organizations, (3) CDC/CDFI, (1) for profit, (1) community group and (1) other. A total of 47 participants completed an online survey prior to the event. The survey asked

participants about key needs in the community that FFBKC should consider when building a CRA Strategic Plan. The Bank will use the insights gained to guide efforts in product development and community outreach. Additional symposiums are being considered, owing to the strength of participation and quality of feedback received. An Executive Summary of the event is attached to this Plan as Exhibit E.

Public Comment

The Bank published notice of the availability of the proposed Strategic Plan, required by 12 C.F.R. § 345.27(d)(2), on Monday, November 28, 2022, in the Kansas City Star, the newspaper with the largest readership within the Banks assessment area. The public comment period started on Monday, November 28, 2022, and ended on Tuesday, December 27, 2022. All comments will be reviewed and considered by Bank management and the Bank will amend the Strategic Plan, if appropriate, to address concerns identified, where permissible under CRA rules and regulations. All comment letters will be provided to the FDIC as a part of the Strategic Plan submission. The comments will also be included in the Bank's CRA public file. A copy of the Public Notice is attached as Appendix B.

Summary of Public Comment Letters Received

No public comments were received.

Bank Response to the Public Comment Letters

No public comments were received.

Summary of Commentary on Current Economic Conditions
By Federal Reserve District

August 2022

Federal Reserve Bank of Kansas City

Summary of Economic Activity

The Tenth District economy expanded slightly, with much of the growth in business sales and revenue being driven by higher prices rather than a greater volume of activity. Consumer spending was mostly unchanged. Yet, more households began to report difficulty in meeting regular expenses, and delinquencies on utility payments picked up slightly. Amid high levels of overall production, new orders and backlogs at manufacturers declined modestly, indicating some softening of overall demand. Job growth was constrained by difficulties in attracting applicants. Many contacts indicated that worker turnover declined moderately, and that they were better able to retain high quality workers in recent months. Many businesses reported that they raised worker compensation mid-year in response to high inflation. Prices in the District rose broadly at a robust pace. Lags in the ability to fully pass-through costs led most contacts to report declining margins. Housing rental rates also increased in recent months. Several contacts pointed to an increased prevalence of property investors in both rural and metro rental markets contributing to rental cost pressures.

Labor Markets

Employment grew at a moderate pace in the Tenth District, as the overwhelming majority of contacts expressed difficulty in filling newly opened positions. Most businesses pointed to low numbers of applicants, or qualified applicants, as the primary challenge to recruiting. Many contacts also highlighted difficulty in meeting workers' expectations regarding compensation. Worker turnover declined moderately across industries and across District states. Many businesses noted that they have been better able to retain higher quality workers in recent months, although retention continues to be a challenge. Expectations for hiring over the next six months declined modestly as some businesses indicated they do not plan to add to their workforce for the remainder of the year.

Contacts reported broadly they made mid-year adjustments to worker compensation that were tied directly to inflation pressures. Nearly all contacts reported wage increases. In addition, many businesses also made one-time bonus payments, added flexibility in work schedules, or adjusted the benefits they offer. Looking ahead, contacts were mixed on whether further changes to wages or other compensation will be needed before the end of the year. Most contacts expressed they would be more likely to continue inflation-related bonus payments.

Prices

Prices continued to grow at a robust pace. Most contacts reported a slight slowing of input price growth from recent highs, particularly for commodity-related materials. In contrast to the past year, where supply chain disruptions led to outsized increases in input costs for particular products, several contacts noted that input cost pressures are now more broad-based and incremental. Businesses' ability to pass price increases to customers improved moderately. On balance, though, most businesses indicated that price margins declined further as higher selling prices continued to be insufficient to fully offset higher materials costs and rising labor costs.

Consumer Spending

Total consumer spending changed little over recent months. However, several contacts noted sales revenues were supported by higher prices, as quantities sold fell slightly. For example, even restaurants with lower price points commented the number of transactions was lower over the last month. Although consumer delinquencies on credit cards and mortgages remained subdued, more households began to express difficulty in meeting regular expenses as prices rose. Delinquencies on household utility bills picked up slightly.

Community Conditions

Housing affordability challenges for both renters and owners grew moderately in both rural and metro areas, particularly for low and moderate income (LMI) households. Contacts in several District states pointed to pressures on rental housing prices resulting from increases in investor purchases of local homes. Some investors have been reportedly less willing to accept vouchers or less willing to negotiate rents. Although purchase prices of single-family homes moderated somewhat, contacts reported that rising interest rates have pushed many prospective LMI buyers out of the market. Eviction cases increased in recent months. For example, a record number of eviction cases were filed in the Oklahoma County District Court in July and August. Funds from assistance programs for preventing evictions and foreclosures diminished recently.

Manufacturing and Other Business Activity

Revenues at manufacturing firms expanded slightly, primarily due to robust growth in prices with slight decreases in production. Inventories grew mildly. Manufacturing contacts reported modest declines in a number of forward-looking indicators, such as new orders and order backlogs, which point to a tempering of otherwise high levels of demand. Services business contacts, both professional-oriented and consumer-facing, reported moderate growth in revenues but only modest increases on overall activity. Contacts also noted persistent supply chain disruptions continue to hamper growth. In line with softening demand, expectations for future activity over the next six months and planned capital expenditures eased slightly.

Real Estate and Construction

Growth in non-residential real estate activity expanded at a moderate pace. While office vacancies remained elevated, demand for industrial space grew rapidly, and occupancy of retail spaces continued to expand at a moderate pace. Planned development for industrial sites expanded at a robust pace in several states. However, contacts expressed mixed views regarding future development and building activity for commercial properties. As financial conditions continued to tighten, several contacts noted that they were able to adjust terms and covenants, and to continue with planned construction. Other contacts indicated that persistently high materials costs and labor shortages are inhibiting further new development of large commercial projects.

Community and Regional Banking

Loan demand weakened modestly in the past month as rising interest rates and heightened economic uncertainty adversely affected borrower demand. Contacts noted that credit standards remained unchanged and credit quality was stable, with low past due and problem asset levels. Deposits were stable across community and regional banks in the District, but

several contacts noted that competition for deposits intensified as rates rose further. Bankers largely expected credit quality to remain stable over the next six months, but concerns were noted regarding rising inflation and the prospect of a recession.

Energy

Tenth District energy activity was roughly unchanged over the last month, with notable differences across segments of the energy sector. The overall number of newly drilled wells and well completions were steady on net over the last month. Declines in oil prices led to a slight reduction in total active oil drilling rigs in the District. Offsetting those declines, robust increases in natural gas prices contributed to moderate increases in the number of rigs targeted towards natural gas production. Contacts noted that surging natural gas prices were driven by confluence of low inventories, high summer demand amidst historic heat waves, and rising exports. Coal producers also saw a slight uptick in production, due to persistently high demand from electricity generation and elevated coal prices.

Agriculture

Conditions for the Tenth District's farm economy remained favorable, supported by the overall strength in commodity prices, despite elevated volatility in certain markets in recent months. Crop prices remained generally higher than a year ago, but were lower in August compared to earlier in the summer. Specifically, corn and wheat prices declined moderately, and soybean prices also dropped slightly during the past month. Heightened production costs and adverse growing conditions were worse than the national average in some District states over the past month. Several farmers noted that, even with elevated levels of revenue expected this year, net income levels would likely be more subdued. In the livestock sector, profit opportunities remained sound as cattle prices were slightly higher than the previous reporting period and hog prices increased notably.

Federal Reserve Bank of Dallas

Summary of Economic Activity

Growth in the Eleventh District economy continued at a modest pace, though job growth was quite robust. Manufacturing and service sector activity continued to slow, growing at a diminished clip from earlier this year. Retail sales were flat to down, and homes sales remained relatively subdued. Loan demand continued to increase but at a markedly slower pace. Local nonprofits reported increased demand for rent and food assistance amid rising costs. The energy sector expanded further while ongoing drought resulted in significantly lower crop production and culling of livestock herds. Wage growth remained highly elevated due to a tight labor market. Supply chain bottlenecks have begun easing and prices were not rising as fast, though inflation is still high. Outlooks were mixed as uncertainty remained elevated, and contacts voiced concern about slowing demand and the risk of a recession stemming from high prices, weakening consumer sentiment, and rising interest rates.

Notes:

As of the August 2022 forecast, 2021 origination volume was revised based on the 2021 Home Mortgage Disclosure Act data.

Total 1-to-4-family originations and refinance share are MBA estimates. These exclude second mortgages and home equity loans.

Mortgage rate forecast is based on Freddie Mac's 30-Yr fixed rate which is based on predominantly home purchase transactions.

The 10-Year Treasury Yield and 30-Yr mortgage rate are the average for the quarter, but annual columns show Q4 values.

The FHFA US House Price Index is the forecasted year over year percent change of the FHFA Purchase-Only House Price Index.

FFBKC COMMUNITY REINVESTMENT ACT (CRA) STRATEGIC PLAN PUBLIC NOTICE

COMMUNITY REINVESTMENT ACT - STRATEGIC PLAN

The CRA regulations require a bank that has developed a Strategic Plan to publish Notice of the Plan and solicit formal written public comment for at least a 30-day period. In accordance with this requirement, First Federal Bank of Kansas City (FFBKC) hereby provides notice to the public of its intent to submit a two (2) year CRA Strategic Plan to the Federal Deposit Insurance Corporation (FDIC).

Written comments from the public concerning the Strategic Plan are encouraged. To obtain a copy of the Bank's Strategic Plan at no charge to the requesting party, individuals may request a copy at any FFBKC branch or by email/phone by contacting Mike Sidebottom, Chief Risk Officer at 816-245-4153 or Mike.Sidebottom@ffbk.com.

All written comments regarding the Plan should be directed to Mike Sidebottom, Chief Risk Officer, P.O. Box 419194 Kansas City, MO 64141.

Comments and suggestions will be accepted until 12/28/2022, following which time the Plan will be submitted for approval to the Federal Deposit Insurance Corporation. The Bank will review all comments and incorporate suggestions into the Plan at its discretion. The Bank received a Satisfactory rating on its last CRA performance evaluation under the Intermediate-Small Bank exam, conducted in March 2019. Copies of the most recent CRA examination are available upon request.

APPENDIX E

FFBKC CRA SYMPOSIUM EXECUTIVE SUMMARY

EXECUTIVE SUMMARY
CRA COMMUNITY IMPACT & NEEDS SYMPOSIUM
OCT. 26, 2022

On Wednesday, October 26, 2022, First Federal Bank of Kansas City (FFBKC) hosted a **Community Impact and Needs Symposium** luncheon at the bank's Leawood, Kansas Administrative Center with top leaders from Kansas City representing (36) non-profits, (5) faith-based organizations, (3) CDC/CDFI, (1) for profit, (1) community group and (1) other. A total of 47 participants completed an online survey prior to the event. The survey asked participants about key needs in the community that FFBKC should consider when building a CRA Strategic Plan. Father Justin Mathews, CEO/Pres. of Reconciliation Services, served as the moderator and used the survey results to lead an open, candid discussion about the issues.

Survey Results:

- *What are the biggest challenges you face as an organization in fulfilling your mission? The top answers were improving community awareness of their programs, access to governmental and other resources, and fundraising.*
- *Indicate the top 3 Community Development challenges/needs in your service area. The #1 need was availability of affordable rental housing, #2 availability of affordable single-family housing, #3 homelessness (providing shelter, temporary housing, and other services).*
- *Banks provide capital and services for Community Development in four primary areas: affordable housing for LMI, activities to revitalize or stabilize LMI geographies, community services to LMI, and economic development by financing small businesses or farms. Of these 4 areas, which do you think is the greatest need in your service area? 58% of participants indicate affordable housing for LMI as the most important service followed by 24% selecting activities that revitalize or stabilize LMI geographies, 11% community services to LMI, and 8% economic development by financing small businesses or farms.*
- *Indicate the top banking service or products of highest, second highest and third highest need in your service area. The highest need was for low down payment/other mortgage programs followed by financial education. The second highest need was low down payment/other mortgage programs followed by grant programs for homebuyers. The third highest need was credit restoration programs followed by financial planning.*
- *What is the most effective way for financial institutions to promote/market their products and services? 35% of participants say social media is the most effective, 16% website, 14% radio, 13% text, 10% email, 2% newspaper.*

Symposium Discussion:

At the symposium, participants were asked to share one word that symbolized what their clients have been through post-Covid: **trauma, despair, isolation, loss, uncertainty, grief, destitution, stress, depression**. Most agreed that getting the word out about their services is the top challenge. They also talked about not having enough staff to meet the needs of all clients, lack of fundraising, childcare, and they believe volunteerism has decreased significantly from "corporate America" since the pandemic.

The largest discussion surrounded what these organizations deem to be the top needs in our community: affordable rental housing and affordable single-family housing. Participants expressed how many of their clients are facing rising rent payments, and there simply aren't enough single-family housing or apartment options available to support the demand. Property owners are evicting more families, making Kansas City one with the highest eviction rates in the country. Evicted families struggle to find affordable housing, which means many children are moved from school to school. Housing agencies such as Community Housing of Wyandotte County, Habitat for Humanity and Westside housing, shared that it's hard to build more units due to rising land

values, high production costs and supply chain issues. Developers are focused on luxury homes or luxury apartment buildings. Housing is NOT being viewed as a basic need, like food or clothing.

When discussing bank products or services, leaders said lack of trust, lack of knowledge and few bank branches located in LMI areas cause their clients to seek out quick cash shops and payday loans in their community. They do not believe that accessing digital banking is a realistic option for their LMI clients who lack smart phones or experience with these specialty apps. **These clients prefer to meet with a banker face-to-face.**

The participants would like to see banks provide larger down payment assistance, grants and portfolio mortgage options that allow more flexible qualifications for low-to-moderate income individuals. One participant who is the president of an organization for Black realtors said that it is unfair that a person who has successfully paid their rent for 20 years with no evictions on their track record is not eligible for a mortgage due to “no or low” credit scores. They understand that credit scores are the standard, and this process does work for most buyers who have had access to mechanisms to build their credit scores over time. However, this same credit system does not work for everyone. Participants said they hate to see their clients discouraged after attending a homebuyer education class and earning their homebuyer certificate just to find out they don’t meet the minimum qualifications for a mortgage due to a low credit score or lack of savings. And if they do get preapproved, they struggle to find a home in their price range due to low inventory.

Potential Takeaways:

Today’s economy is an extraordinarily challenging time for all homebuyers with high interest rates, low inventory, and bidding wars across the nation. Even the savviest and most financially stable homebuyer is having trouble navigating this climate. Nonprofit leaders affirmed this task is even more daunting to overcome for low-to-moderate income individuals who lack credit scores and savings to secure financing. The bank’s Community Development team is experiencing these conditions when trying to work with LMI families. The current credit scores banks utilize will continue to be barriers to LMI families, especially minorities. For example, since the Fair Housing Act of 1968, there has been only a 2-4% increase in black homeownership. Banks need to think creatively to solve this issue.

For example, consider changes to portfolio products to better meet the needs of LMI with more flexible underwriting, higher LTV financing and alternative credit references that include rent payment history and utilities. Improved portfolio products can help the bank reach LMI families just like the success of the ITIN loan product. Consider increasing grant programs to better compete with the incentives offered by other bank competitors. LMI families are taking homebuyer education classes to earn their homebuyer certificates, but those same individuals are turning to other lenders that offer loan products with a 580 minimum credit score and more financial assistance, such as UMB’s 5% down payment and 2% closing costs, or Simmons Bank’s new ITIN loan program that offers all clients the option of 10% down payment.

Next steps:

- At the symposium, only a handful of the organizations noted housing development as their primary service. However, even organizations outside of the housing space agree that finding affordable housing is the #1 issue for their clients. They agreed that studies show not having stable housing affects everyone in the household, including their mental and physical well-being, children’s educational outcomes, and financial stability. Because of this, additional symposiums can be organized with the same attendees to discuss solutions and potential partnerships to address the housing crisis, with breakout groups to dive deeper into potentials products and solutions. Solutions created from these conversations could be forwarded to other city leaders.
- Invite case managers to a separate event so they can network with their peers. They can discuss referring clients to one another if their organization doesn’t provide the necessary service, and they can learn more about FFBKC, financial education classes and loan options for their clients.

- Work with FFBKC Loan Committee and Risk to ideate a portfolio loan product that will address the needs of the LMI borrower to help clients begin their homebuying journey and end the cycle of lifelong renting.

Post-event Feedback:

Follow-up emails were sent to each attendee, asking for anonymous feedback as the bank considers creating and planning a follow-up event. 12 responses were received, with the majority (8) rating the experience with 5 stars. Two participants rated the bank 4 stars based on the difficulty finding the office, and suggested a map be included in the invitation. One participant gave us a 3 rating because they said this was a great starting point, but they want us to take a deeper dive into a particular topic to create a significant impact.

Please share any additional feedback about the event.

- *"Nice event all the right people in the room. Father Justin did a great job as moderator."*
- *"Thank you for the gifts!"*
- *"I would highly recommend hosting a separate event for all the organization's case managers. That would serve multiple purposes 1) allows our case managers to network with one another, 2) could serve as continuing education / training, 3) provides First Federal with direct access to the influencers of clients. Our case managers know the most about our clients and clients' needs."*
- *"Great diversity of industry professionals and client facing relationships."*
- *"I appreciated the invitation."*
- *"Everyone was wonderful and welcoming. Thank you for inviting us to participate."*
- *"Great atmosphere, good people, and overall good experience. Thank you for leading this conversation."*
- *"Great event. Justin did a great job moving us thru the topics."*
- *"I had a great time it was informative and very relevant networking event."*

How can we improve this event?

- *"Thought it was great. I wouldn't do anything differently."*
- *"It was hard to find. Maybe a map."*
- *"It really was a great event. Only suggestion I have is to pick one or two topics and have a more thorough and deep dive discussion about those specific topics."*
- *"One consideration would potentially be a client version of the summit to hear what potential customers, both banking ready and those not using banking at all, would like to see."*
- *"The event format was fine, and Father Justin did a great job facilitating. I think moving on to other topics is extremely helpful. It's hard to pack everything into a single session."*
- *"We need to discuss solutions and address policy changes that will better address the needs of those we serve."*
- *"More community members, maybe better setting facing each other."*
- *"It would be nice to take a deeper dive into a particular topic. This was a great starting point and opportunity to network with other community leaders. How can we use the collective expertise and perspective to drive significant impact?"*
- *"If as a group we could; - Isolate one concern (as a group develop a list and pick one issue) - Brainstorm a list of solutions to address the issue -reach a consensus on one viable (feasible, measurable, and most impactful) solution - create a plan- present to Bank"*
- *"New topic. Very good discussion and participation"*

What topics would you like to discuss in future sessions?

- *"I would like to hear more about the programs the bank is working on."*
- *"Education, jobs, transportation"*
- *"How can the bank partner with non-profits to help clients?"*

- *“More focus on our clients. What's it looks like when clients travel back and forth across service territories.”*
- *“Credit repair process, mortgage options and assessing mortgage readiness, preparing for generational awareness through financial planning for young children.”*
- *“Auto and other consumer Loans. Small business loans (especially for those who are just starting out)”*
- *“Solutions”*
- *“Community wealth building” & “Funding and Opportunities”*
- *“Explain how your community banking operations are “relationship” based as opposed to “transactional” based. Explain how your community banking model works. Explain the footprint of community; -In a typical local branch what is the area of concern-how empowered community liaisons are to be personal and locally impactful as community partners?”*

List of Attendees:

Organization Name

Urban Community Connections
Habitat for Humanity of Kansas City
Reconciliation Services
Salem Baptist Church
Urban Neighborhood Initiative
Community Services League
Community Housing of Wyandotte Co.
Altcap
Benedictine Sisters - Keller Women's Center
Marlborough Community Land Trust
Hispanic Chamber of Commerce
Hall Family Foundation
College Coaching Network
Coldwater
Salvation Army
Pawsperity
Hillcrest Ministries
Westside Housing Foundation
Reconciliation Services
Zotung Christian Church
A Turning Point
Rebuilding Together KC
Urban Neighborhood Initiative
Community Housing of Wyandotte Co.
Harvesters of Kansas City
YMCA of Greater KC
